

Forensic Analysis Report

Report Date	2025-11-24T23:07:20.599730
Log File	sample_logs.txt
Analysis ID	73ddbd8c
Generated On	2025-11-24 23:19

Executive Summary

Key Metrics

Metric	Value
Total Events Analyzed	107
Total Incidents Detected	12
Critical	4
High	4
Medium	4
Low	0
Indicators of Compromise	15

Findings (Detected Incidents)

[Critical] Ransomware_Detected (Confidence: 95%)

Detected 1 occurrences of "ransomware" - indicating ransomware activity

[Critical] Malware_Detected (Confidence: 95%)

Detected 1 occurrences of "malware" - indicating malware activity

[Medium] Suspicious_Activity (Confidence: 75%)

7 suspicious events logged - requires investigation

[Medium] Authentication_Failures (Confidence: 75%)

16 failed authentication attempts detected

[Critical] Successful_Compromise_After_Attempts (Confidence: 92%)

Successful authentication after 16 failures - likely compromise

[Medium] Suspicious_Port_139 (Confidence: 88%)

NetBIOS Exposure (Port 139) - 1 occurrences detected

[High] Port_Scanning_Activity (Confidence: 85%)

60 unique ports accessed - possible port scan

[High] Account_Lockout_Events (Confidence: 90%)

6 account lockout events - indicating attack attempts

[High] Privilege_Escalation_Activity (Confidence: 85%)

9 privilege escalation indicators detected

[Medium] PowerShell_Execution (Confidence: 85%)

6 PowerShell executions detected

[Critical] SQL_Injection_Attempt (Confidence: 92%)

SQL injection pattern detected: "sql injection" (1 times)

[High] Web_Exploit_Attempt (Confidence: 88%)

Web exploit pattern detected: xss (1 times)

Indicators of Compromise (IOCs)

Type	Indicator	Severity
IP	88.43.77.19	High
IP	185.35.66.203	High
IP	178.91.81.12	High
IP	221.15.7.13	High
IP	91.27.221.4	High
IP	203.0.113.9	High
IP	172.20.22.2	High
IP	38.115.74.1	High
IP	145.102.31.29	High
IP	128.66.154.8	High
IP	82.172.18.32	High
IP	203.91.22.153	High
Port	139	High
IP	212.102.45.12	High

IP	178.44.66.12	High
----	--------------	------

Recommendations & Mitigation Strategies

Priority 1: IMMEDIATE ACTION REQUIRED: 4 critical threats detected requiring instant response. Activate incident response team, isolate affected systems, and preserve forensic evidence. Treat as active breach - assume full compromise until proven otherwise.

Priority 2: AUTHENTICATION SECURITY: Implement immediate account lockout after 3-5 failed attempts. Enable MFA on all accounts. Review authentication logs for compromised credentials. Force password reset for all users showing failed login patterns.

Priority 3: NETWORK CONTAINMENT: Block all suspicious ports (4444, 31337, 3389, etc.) at perimeter firewall. Implement network segmentation. Monitor all outbound connections. Review firewall rules and disable unnecessary services.

Priority 4: MALWARE RESPONSE: Immediately isolate infected systems from network. Deploy EDR/antivirus scans across infrastructure. Restore from clean backups. Do NOT pay ransom - engage cybersecurity incident response team.

Priority 5: PRIVILEGE MANAGEMENT: Review all admin account activities. Implement least privilege principle. Audit service accounts. Monitor privileged command execution. Rotate all administrative passwords.

Priority 6: WEB APPLICATION SECURITY: Patch all web applications immediately. Implement WAF rules. Review and sanitize all input validation. Conduct code review for injection vulnerabilities.

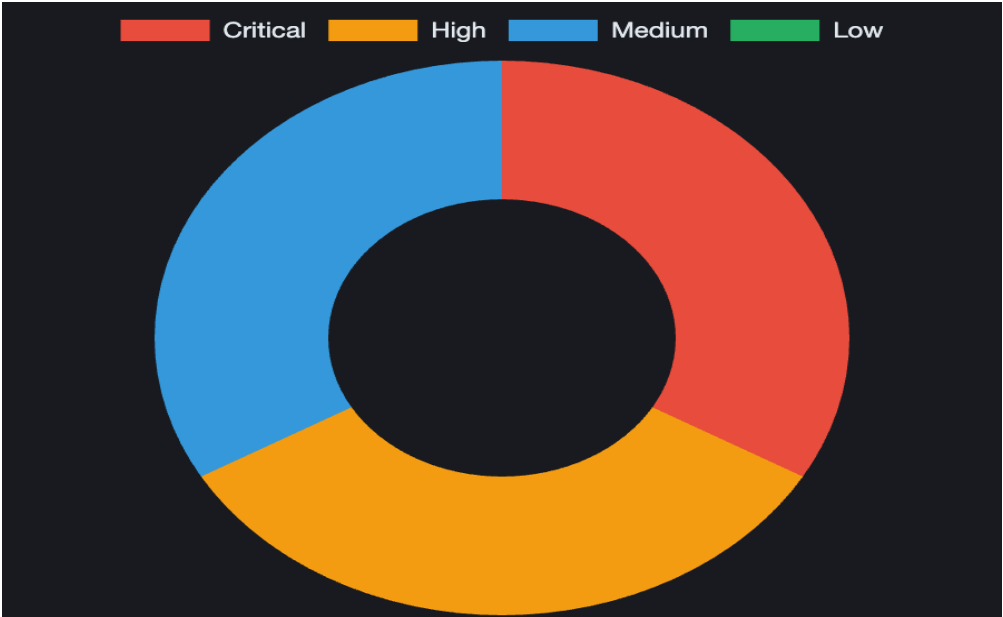

Priority 7: EXECUTION PREVENTION: Disable PowerShell/CMD for standard users. Implement application whitelisting. Monitor script execution. Review process creation events. Block macro execution in Office documents.

Priority 8: IOC BLOCKING: Block all 15 identified indicators at multiple layers (firewall, proxy, DNS, endpoint). Share IOCs with threat intelligence platform. Monitor for IOC recurrence indicating persistent access.

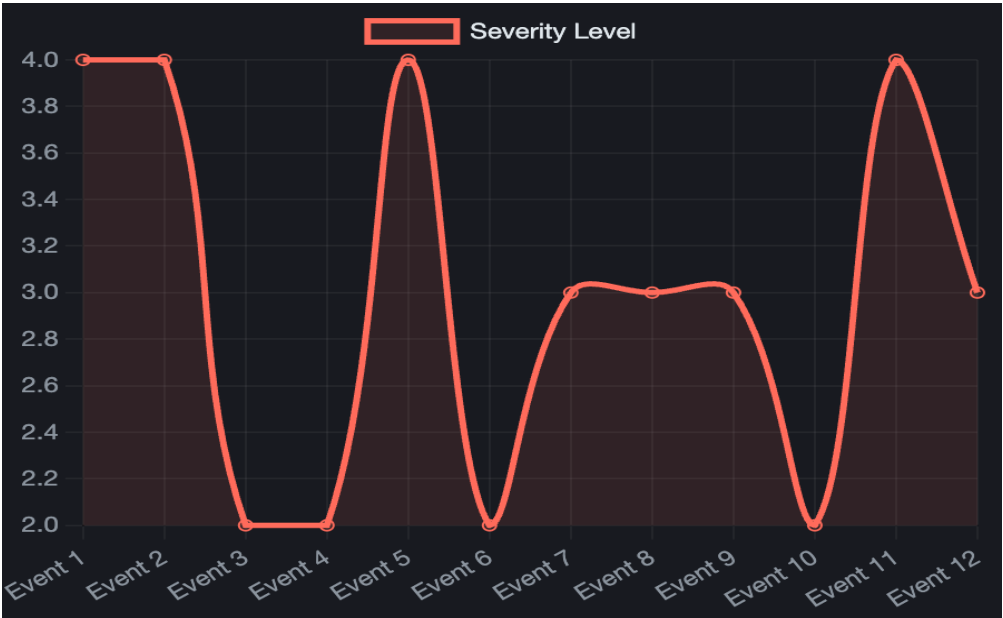

Priority 9: DOCUMENTATION: Document all findings, actions taken, and timeline. Preserve logs and forensic evidence. Update incident response playbook. Conduct post-incident review. Report to stakeholders and board.

Analysis Summary Stats

Analysis Statistics:

Detected 12 incidents: 4 Critical, 4 High severity

Analysis Duration: 0.00 seconds

File Size: 7.99 KB

Total Lines Analyzed: 0

This report was automatically generated by ForensicX - Digital Forensic Analysis System v1.0.0
