

Forensic Analysis Report

Report Date	2025-11-26T23:17:36.117463
Log File	raw_logs.txt
Analysis ID	f01c38ea
Generated On	2025-11-26 23:25

Executive Summary

Key Metrics

Metric	Value
Total Events Analyzed	100
Total Incidents Detected	5
Critical	1
High	2
Medium	2
Low	0
Indicators of Compromise	54

Findings (Detected Incidents)

[Medium] Suspicious_Activity (Confidence: 75%)

7 suspicious events logged - requires investigation

[Medium] Authentication_Failures (Confidence: 75%)

12 failed authentication attempts detected

[Critical] Successful_Compromise_After_Attempts (Confidence: 92%)

Successful authentication after 12 failures - likely compromise

[High] Suspicious_Port_445 (Confidence: 88%)

SMB Exposure (Port 445) - 2 occurrences detected

[High] Port_Scanning_Activity (Confidence: 85%)

55 unique ports accessed - possible port scan

Indicators of Compromise (IOCs)

Type	Indicator	Severity
IP	203.0.1.89	High
IP	203.0.2.33	High
IP	203.0.2.91	High
IP	203.0.2.67	High
IP	203.0.1.98	High
IP	203.0.2.95	High
IP	203.0.3.28	High
IP	203.0.2.65	High
IP	203.0.1.99	High
IP	203.0.1.18	High
IP	203.0.3.91	High
IP	203.0.2.22	High
IP	203.0.1.74	High
IP	203.0.2.59	High
IP	203.0.1.6	High

Recommendations & Mitigation Strategies

Priority 1: IMMEDIATE ACTION REQUIRED: 1 critical threats detected requiring instant response. Activate incident response team, isolate affected systems, and preserve forensic evidence. Treat as active breach - assume full compromise until proven otherwise.

Priority 2: AUTHENTICATION SECURITY: Implement immediate account lockout after 3-5 failed attempts. Enable MFA on all accounts. Review authentication logs for compromised credentials. Force password reset for all users showing failed login patterns.

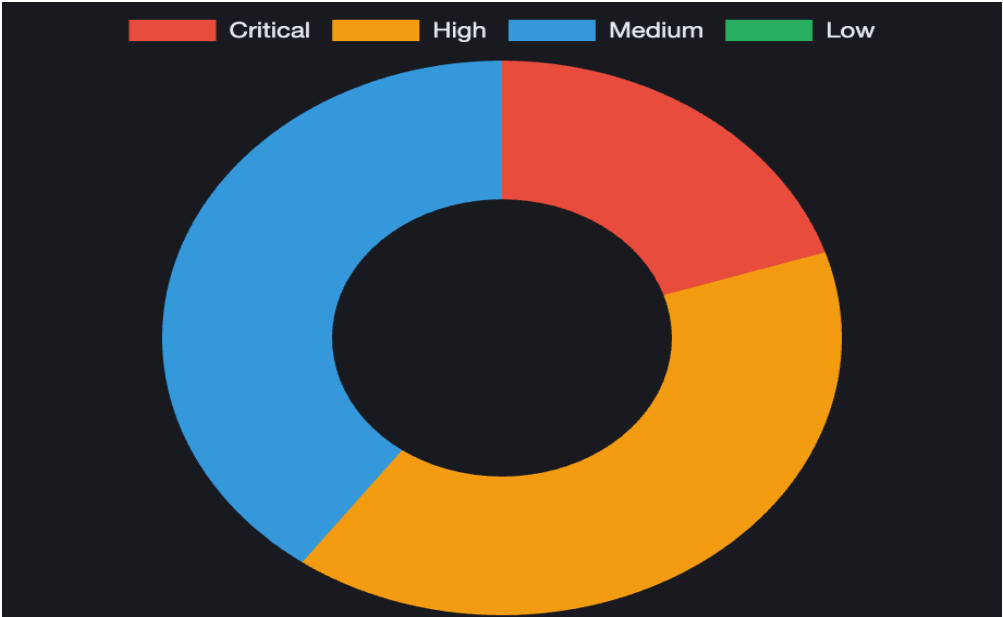

Priority 3: NETWORK CONTAINMENT: Block all suspicious ports (4444, 31337, 3389, etc.) at perimeter firewall. Implement network segmentation. Monitor all outbound connections. Review firewall rules and disable unnecessary services.

Priority 4: IOC BLOCKING: Block all 54 identified indicators at multiple layers (firewall, proxy, DNS, endpoint). Share IOCs with threat intelligence platform. Monitor for IOC recurrence indicating persistent access.

Priority 5: DOCUMENTATION: Document all findings, actions taken, and timeline. Preserve logs and forensic evidence. Update incident response playbook. Conduct post-incident review. Report to stakeholders and board.

Analysis Summary Stats

Analysis Statistics:

Detected 5 incidents: 1 Critical, 2 High severity

Analysis Duration: 417.57 seconds

File Size: 8.32 KB

Total Lines Analyzed: 0

This report was automatically generated by ForensicX - Digital Forensic Analysis System v1.0.0
